HOME LOCKERS

Safety for valuables comes in all forms and sizes, with different levels of strength suited for different needs. Thoughtful engineering goes into the designing of every Home Locker from the house of Godrej. Godrej Home lockers are designed keeping in mind that vulnerable areas like hinges, pillars, back of the door and the back of the locker are all thoughtfully strengthened. The multi-bend construction of metal sheets ensure that each locker meets the highest quality standards. Lockers from Godrej also come with hi-tech locking options such as key access, biometric authentication and digital passwords. Not all lockers are equally strong and not all lockers are fire resistant. Therefore, choosing the right option basis one's requirement is extremely important.
